Every four to ten years, something happens to the weather system of the Earth. Everything changes, and scientists don't know why. The low - pressure area moves toward the east, the high - pressure area is very weak, and the winds blow toward the east. A great pile of warm surface water moves toward South America. People call this " EL Nino". It usually happens at Christmas time, and EL Nino is the Spanish name for the baby Jesus.

Usually the effects of EL Nino are very mild. However, the one that started in 1982 was different from the other recent ones. It had a very powerful effect on the world's climate. It caused huge changes in the ocean currents. It caused floods in some areas and droughts in others. There were terrible windstorms and huge ocean waves swept houses into the sea. EL Nino did billions of dollars worth of damage. Thousands of people lost their lives and thousands of others were left homeless.

In 1983, the winds, ocean currents, and pressure areas started to become normal again. Meanwhile, scientists throughout the world organized research to learn more about EL Nino. They are using satellites and research boats to observe the atmosphere and the ocean. It is a very complicated problem, but if the scientists of the world work together, they should be able to learn the causes of EL Nino. Then they will be able to predict what will happen and work to prevent a repeat of the death and destruction of 1982 - 1983.

To many people, smoking is not only a pleasure but also an addiction. They need smoking, depend on it, and can hardly get rid of it. If they do not smoke for hours, they will feel a craving for a cigarette. They often chain-smoke that means they light one cigarette after another. Smoking is often considered anti-social because many people do not like the smell of cigarettes or the sight of the smoker's stained fingers and of ash-trays full of cigarette-ends. Above all, smoking is harmful to health. In many countries, they forbid to advertise cigarettes and a warning is printed every packet of cigarette that is "Smoking is bad for your health". Scientists have proved that there is a close link between smoking and lung diseases, such as cough and tuberculosis and the worst of all is a fatal cancer.
