Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 36 to 42.

As heart disease continue to be the number-one killer in the United States, researchers have become increasingly interested in identifying the potential risk factors that trigger heart attacks. high-fat diets and 'life in the fast lane' have long been known to contribute to the high incidence of heart failure. But according to new studies, the list of risk factors may be significantly longer and quite surprising.

Heart failure, for example, appears to have seasonal and temporal patterns. A higher percentage of heart attacks occur in cold weather, and more people experience heart failure on Monday than on any other day of the week. In addition, people are more susceptible to heart attacks in the first few hours after waking. Cardiologists first observed this morning phenomenon in the mid-1980, and have since discovered a number of possible causes. An early-morning rise in blood pressure, heart rate, **and** concentration of heart stimulating hormones, plus a reduction of blood flow to the heart, may all contribute to the higher incidence of heart attacks between the hours of 8:00 A.M. and 10:00A.M.

In other studies, both birthdays and bachelorhood have been implicated as risk factors. Statistics reveal that heart attack rates increase significantly for both females and males in the few days immediately preceding and following their birthdays. And unmarried men are more at risk for heart attacks than their married counterparts. Though stress is thought to be linked in some way to all of the aforementioned risk factors, intense research continues in the hope of further comprehending why and how heart failure is triggered.

Question 36. What does the passage mainly discuss?

- A. seasonal and temporal patterns of heart attacks
- B. cardiology in the 1980s
- C. risk factors in heart attacks
- D. diet and stress as factors in heart attacks

Question 37. The word “trigger” as used in line 2 is closest in meaning to which of the following?

- A. affect

- B. rate
- C. chance
- D. increase

Question 39. The phrase ‘susceptible to’ in line 8 could best be replaced by

- A. affected by
- B. prone to
- C. aware of
- D. accustomed

Question 40. According to the passage, which of the following is NOT a possible cause of many heart attacks?

- A. decreased blood flow to the heart
- B. increased blood pressure
- C. increase in hormones
- D. lower heart rate

Question 41. Which of the following is NOT cited as a possible risk factor?

- A. having a birthday
- B. being under stress
- C. getting married
- D. eating fatty foods

Question 42. Which of the following does the passage infer?

- A. We have not identified many risk factors associated with heart attacks.
- B. We now fully understand how risk factors trigger heart attacks.
- C. We do not fully understand how risk factors trigger heart attacks
- D. We recently began to study how risk factors trigger heart attacks.

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 43 to 50.

Since the dawn of time, people have found ways to communicate with one another. Smoke signals and tribal drums were some of the earliest forms of communication. Letters, carried by birds or by humans on foot or on horseback, made it possible for people to communicate larger amounts of information between two places. The telegram

and telephone set the stage for more modern means of communication. With the invention of the cellular phone, communication itself has become mobile.

For you, a cell phone is probably just a device that you and your friends use to keep in touch with family and friends, take pictures, play games, or send text message. The definition of a cell phone is more specific: it is a hand-held wireless communication device that sends and receives signals by way of small special areas called cells.

Walkie - talkies, telephones and cell phones are duplex communication devices: They make it possible for two people to talk to each other. Cell phones and walkie-talkies are different from regular phones because they can be used in many different locations. A walkie-talkie is sometimes called a half-duplex communication device because only one person can talk at a time. A cell phone is a full-duplex device because it uses both frequencies at the same time. A walkie-talkie has only one channel. A cell phone has more than a thousand channels. A walkie-talkie can transmit and receive signals across a distance of about a mile. A cell phone can transmit and receive signals over hundreds of miles. In 1973, an electronic company called Motorola hired Martin Cooper to work on wireless communication. Motorola and Bell Laboratories (now AT& T) were in a race to invent the first portable communication device. Martin Cooper won the race and became the inventor of the cell phone. On April 3, 1973, Cooper made the first cell phone call to his opponent at AT& T while walking down the streets of New York city. People on the sidewalks gazed at Cooper in amazement. Cooper's phone was called A Motorola Dyna-Tac. It weighed a whopping 2.5 pounds (as compared to today's cell phones that weigh as little as 3 **01.4** ounces)

After the invention of his cell phone, Cooper began thinking of ways to make the cell phone available to the general public. After a decade, Motorola introduced the first cell phone for commercial use. The early cell phone and its service were both expensive. The cell phone itself cost about \$3, 500. In 1977, AT & T constructed a cell phone system and tried it out in Chicago with over 2,000 customers. In 1981, a second cellular phone system was started in the Washington, D.C and Baltimore area. It took nearly 37 years for cell phones to become available for general public use. Today, there are more than sixty million cell phone customers with cell phones producing over thirty billion dollars per years.

Câu 37. Đáp án B

Trigger (gây ra, kích thích, khiêu khích) = Cause (gây ra)

Affect = ảnh hưởng

Encounter = chạm trán, đối mặt

Involve = bao gồm

Câu 38. Đáp án B

incidence = sự tác động vào; tỉ lệ

rate = tỉ lệ

factor = yếu tố

chance = cơ hội

increase = sự gia tăng

Câu 39. Đáp án B

susceptible to something = dễ bị ảnh hưởng, dễ bị mắc cái gì

Prone to something = dễ có xu hướng gì

Câu 40. Đáp án D

Từ dòng 5 đoạn 2: An early-morning *rise* in blood pressure, *heart rate*, and concentration of heart stimulating hormones, plus a reduction of blood flow to the heart, may all contribute to the *higher incidence of heart attacks* -> nhịp tim thấp ít có khả năng gây ra đau tim

Câu 41. Đáp án C

Dòng 3 đoạn 3: *unmarried men are more at risk for heart attacks than their married counterparts* -> những người không kết hôn dễ bị đau tim hơn -> việc kết hôn không phải là yếu tố gây đau tim

Câu 42. Đáp án C

Trong câu cuối: *intense research continues in the hope of further comprehending why and how heart failure is triggered* -> những cuộc nghiên cứu mở rộng vẫn tiếp tục trong hi vọng hiểu hơn lí do và cách thức gây ra suy tim -> vẫn còn cần nghiên cứu -> vẫn chưa hiểu đầy đủ
