C. READING

1. Read the passage and answer each question. Circle A, B, or C.

The Shichi-go-san Festival

Shichi-go-san is a Japanese festival. The Japanese celebrate it on 15 November every year. This is because people believe it is a day of good luck for all Japanese people.

Shichi-go-san means “seven-five-three” and the festival is for children who are seven, five and three. The Japanese think these ages are very important years. Japanese parents celebrate Shichi-go-san as their boys turn three and five and their girls turn three and seven.

At the age of seven, a girl wears *obi* - the piece of cloth worn round the waist over the kimono - for the first time. At the age of five, a boy wears his first *hakama* pants – the

pants that Samurai wore in the past - in public. The age of three is important for the Japanese too. They think it is time children can let their hair grow.

On this day, children often dress up like the adults in the ancient times and pretend to be grown up themselves.

1. Who will probably celebrate the Shichi-go-san Festival?

- A. a seven-year-old boy
- B. a three-year-old boy
- C. a five-year-old girl

2. Who will NOT celebrate the Shichi-go-san Festival?

- A. a five-year-old girl
- B. a five-year-old boy
- C. a seven-year-old girl

3. Who wears *obi* for the first time?

- A. a five year-old girl
- B. a seven-year-old boy
- C. a seven-year-old girl

4. At what age can a Japanese child let the hair grow?

- A. five years old
- B. three years old
- C. seven years old

5. Why do the Japanese celebrate it on 15 November?

- A. Because they think the day brings luck to them.
- B. Because the day brings luck to them.
- C. Because children dress up like the adults in the ancient times on the day.

II. Read about traffic problems in two cities. Match the city with its problem.

A. Ho Chi Minh City

B. Bangkok

In Ho Chi Minh City, it is not strange to see the sight of a street that is crowded with vehicles. People cannot move and their health is affected by polluted air from exhausted fumes. What are the reasons? The citizens in the city use many personal vehicles to go from one place to another. They aren't used to transporting by public transports. May be because the bus drivers are careless, impolite to them or the taxi fare is too high for some people.

Bangkok is world renowned for its terrible traffic problems, so getting around on the roads is a bit of a nightmare. In my opinion, there are 3 main causes of Bangkok traffic jams. First, the quality of public transportation is low. Bus is of low quality and causes congestion. Second, the BTS and MRT are not enough for users. Finally, the most important cause of traffic jam is car accidents. Bad bus drivers cause accidents frequently and make the road stuck for hours.

PROBLEMS

1. It has low quality public transport.
2. It costs a lot to go by taxi.
3. There are not enough MRTs for its inhabitants.
4. Its citizens use a lot of personal vehicles.
5. There is a high frequency of accidents.

Read the passage and answer the questions below

One major advantage with the use of renewable energy is that as it is renewable therefore it is sustainable and so will never run out. Renewable energy facilities generally require less maintenance than traditional generators. Their fuel being derived from natural and available resources reduces the costs of operation. Even more importantly, renewable energy produces little or no waste products such as carbon dioxide or other chemical pollutants, so has minimal impact on the environment.

It is easy to recognize the environmental advantages of utilizing the alternative and renewable forms of energy but we must also be aware of the disadvantages. One disadvantage with renewable energy is that it is difficult to generate the quantities of electricity that are as large as those produced by traditional fossil fuel generators. This may mean that we need to reduce the amount of energy we use or simply build more energy facilities. It also indicates that the best solution to our energy problems may be to have a balance of many different power sources. Hydro generators need rain to fill dams to supply flowing water. Wind turbines need wind to turn the blades, and solar collectors need clear skies and sunshine to collect heat and make electricity. Another advantage of renewable energy sources is the reliability of supply. Renewable energy often relies on the weather for its source of power. The current cost of renewable energy technology is also far in excess of traditional fossil fuel generation. This is because it is a new technology and as such has extremely large capital cost.

1. What is the most important advantage of renewable resources?

2. Which is less expensive to operate, non-renewable or renewable energy? Why?

3. What does wind energy need to generate power?

4. Why is the total cost of renewable energy technology far more than that of fossil fuels?
